**Poverty, Climate Change and Knowledge Institutions**  
**TERI-UCT Joint Side Event at COP 18**

**Role of Knowledge Institutions in Catalyzing Climate  
and Development Action: The TERI Experience**

*Doha, 29 November 2012*

The Energy and Resources Institute

# TERI and Sustainable Development

**30 Pro-active years**

# This presentation:

## TERI Experience

Concepts

Cases

## Insights for International Climate Policy

Technology

Capacity Building

Finance

Differentiation

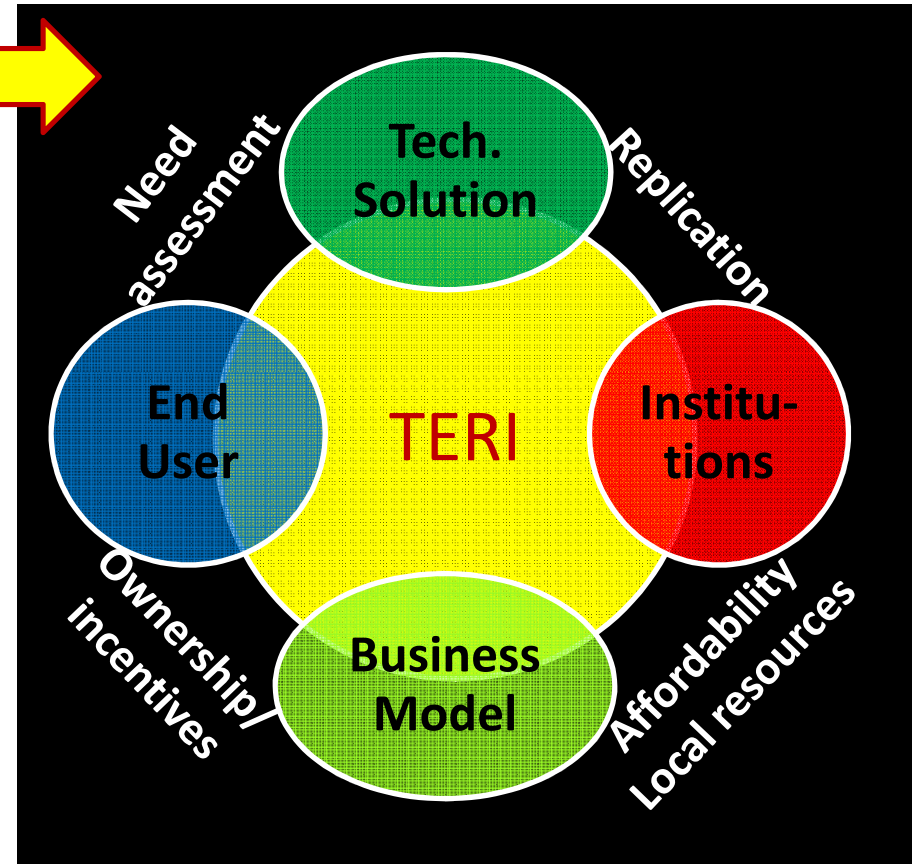

# Select TERI Solutions

Solution	Since	Countries	No. of Projects
Solar Multi-utility / Smart Mini-grid	2000/2011	India, Bangladesh	44 units
Lighting a Billion Lives	2007	Afghanistan, Pakistan, Nepal, Bangladesh, Myanmar, Uganda, Ethiopia, Kenya, Malawi, Mozambique, Ghana, Niger and Sierra Leone	1600 villages
Improved Cook Stoves	1980	India, Uganda, Ethiopia, Kenya	2000 in year 2012; Target 100, 000.
Biomass Gasifier	1984	Thailand, Myanmar, Sri Lanka, Uganda, India	600+ (Thermal) 40 (electrical)
EE in Glass Foundry	2005	India, Bangladesh	120

Before  
Climate  
Change

# The TERI Model

## Knowledge Synthesis

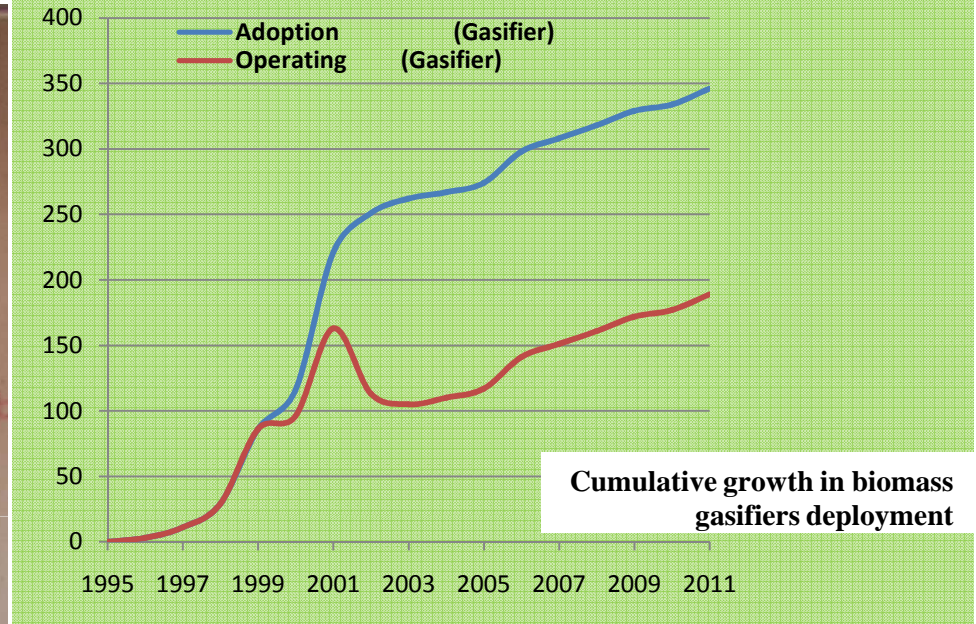

# Solution 1: Biomass Gasifier

Need assessment: access to clean energy, local resources

- **Need based customization**
  - USD 5-20 thousand, 4-8 Months Payback
  - Local resource based
- **Climate benefits**
  - CO2 Neutral
  - 1 liter Diesel: 3-4 kg biomass
  - Adaptation (Post-Tsunami Myanmar; health)
- **Development benefits**
  - Clean energy & health
  - Employment
  - Empowerment
- **Business model & Capacity building**
  - Locally owned and managed
- **Financing: DfID**

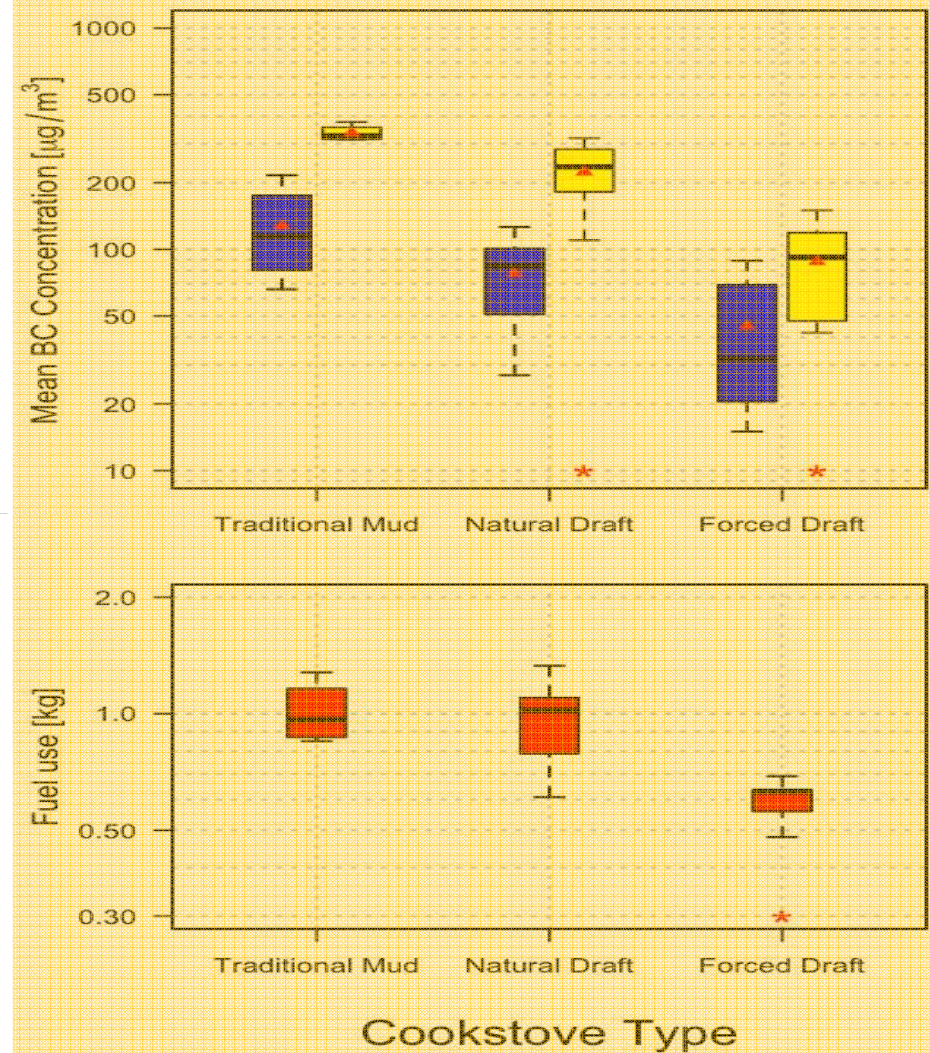

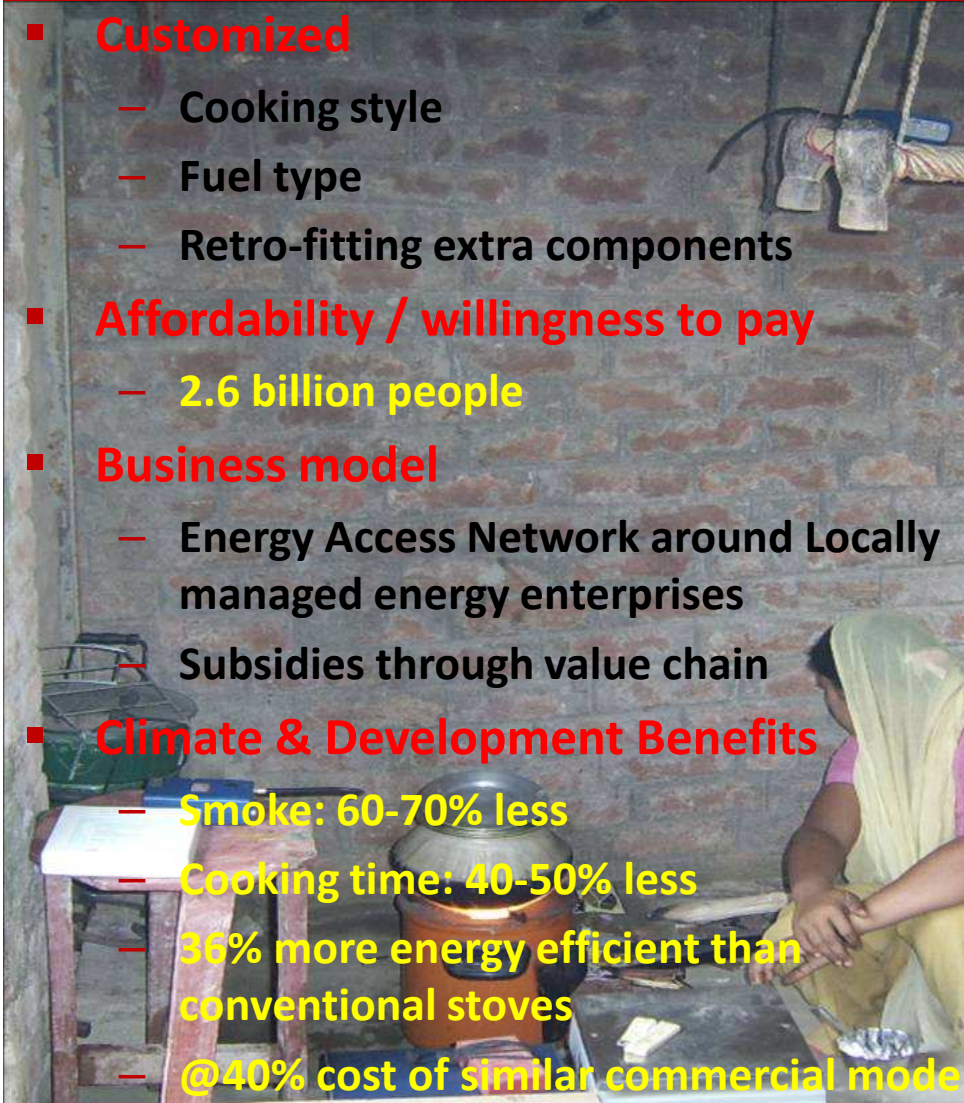

A household lit by gasifier

# Solution2: Improved Cook-stoves (TERI patent)

**Need assessment: clean and efficient fuel, local resources**

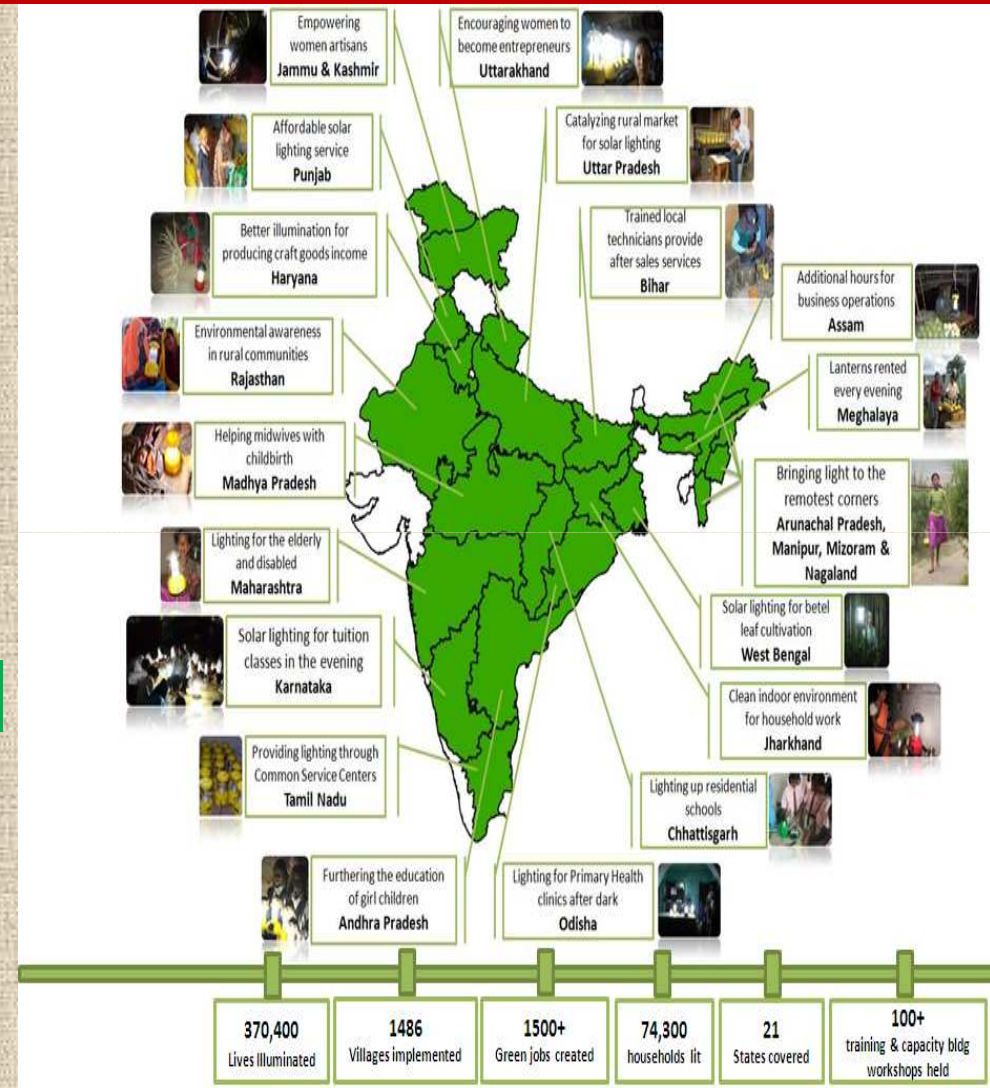

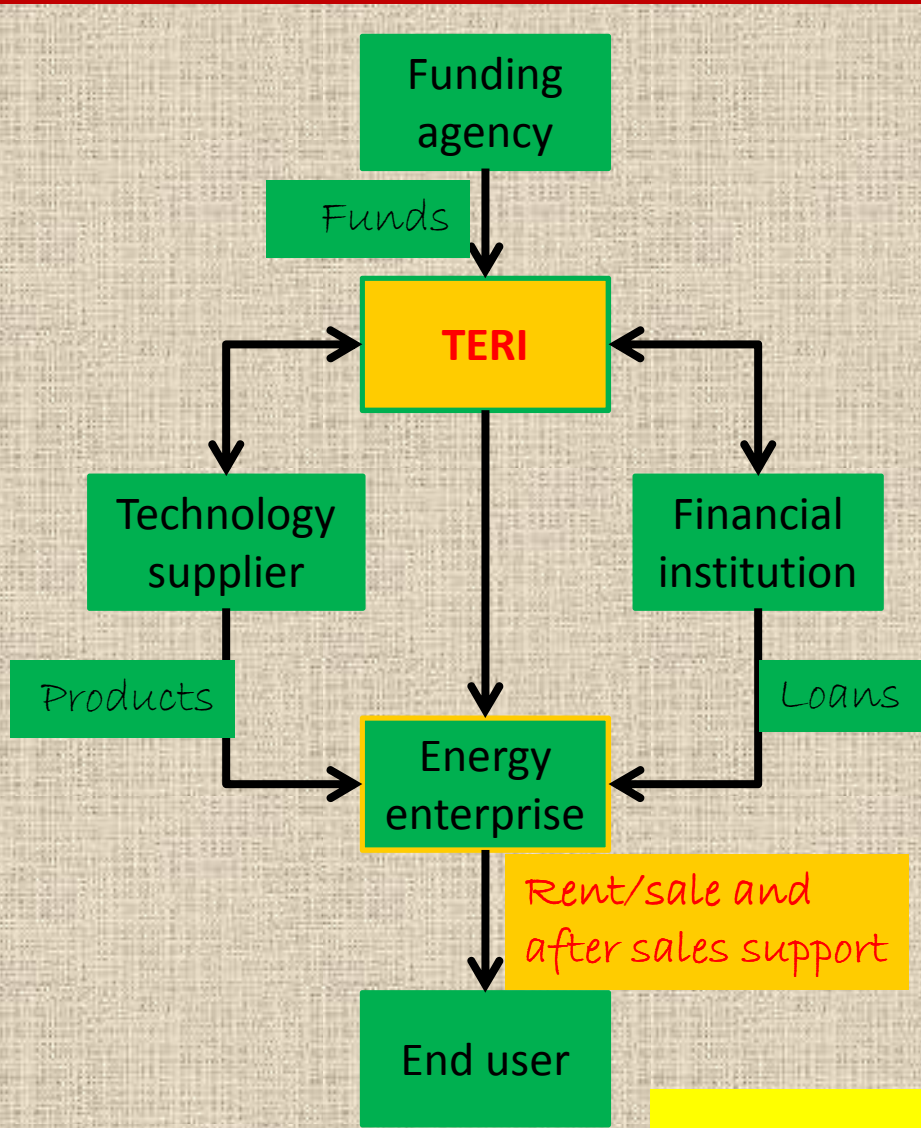

- **Customized**
  - Cooking style
  - Fuel type
  - Retro-fitting extra components
- **Affordability / willingness to pay**
  - 2.6 billion people
- **Business model**
  - Energy Access Network around Locally managed energy enterprises
  - Subsidies through value chain
- **Climate & Development Benefits**
  - Smoke: 60-70% less
  - Cooking time: 40-50% less
  - 36% more energy efficient than conventional stoves
  - @40% cost of similar commercial mode

# Solutionn3: Lighting a Billion Lives

Business model: Flexible, local entrepreneur, capacity building, Innovation

370,400 Lives Illuminated	1486 Villages implemented	1500+ Green jobs created	74,300 households lit	21 States covered	100+ training & capacity bldg workshops held
------------------------------	------------------------------	-----------------------------	--------------------------	----------------------	---

# TERI is highly integrated KI

# To Replicate TERI Experience:

## NETWORKS & RELATIONSHIPS

Customize solutions to local needs and resources

Local capacity building: people and institutions

End-user Ownership

Encourage pro-activeness of KIs

# INTENTION

The Energy and Resources Institute

# Messages for international climate policy

## TDD&T

- Build on the tacit knowledge of KIs in Developing Countries (capacity building)
- IPR should not hinder ownership by end-use

## Finance

- Multiple Business models
- Grant is most effective

## Differentiation

- Local needs and circumstances matter
- Groupings are necessary for replication and scaling-up

Thank you
