ICDL 2010

Shaping the Information Paradigm

Organizer

The Energy and Resources Institute

Co-organizer

Indira Gandhi National Open University

Associates

The journey of the International Conference on Digital Libraries (ICDL) began in 2004. It was in this year that the first ICDL event was inaugurated by Dr A P J Abdul Kalam, former President of India. A conference report, released after the conference, paved the way for future development of digital libraries (DLs) at the national level. After the enormous success of the first event, the second ICDL was held

in 2006. This conference was extremely well received among the national and international participants. It triggered a large number of DL projects in India aimed at bridging the digital divide. The success of the two previous ICDLs have encouraged us to conduct ICDL 2010 to visualize how digital libraries will shape the information paradigm.

Objectives

- Provide a platform and enable interaction among DL experts, researchers, academics, and students;
- Facilitate creation, adoption, implementation and utilization of DL's, and their future contribution towards shaping the information paradigm;
- Enable developed and developing countries to bridge the digital divide through knowledge sharing

Who should participate?

- Library and information science professionals
- IT and knowledge service providers
- Policy makers
- Academicians, researchers, students, and distance learners
- Archivists and museologists
- Information providers, publishers, and vendors
- Knowledge workers, managers, and e-publishers
- Content managers
- Virtual communities
