

## Accommodation and Facilities

- Deluxe tents on twin sharing basis (12 feet × 12 feet × 11 feet)
- Clean bathrooms and toilets (with running hot and cold water)
- Nutritious meals served on time
- Proper security
- Doctor on call and first-aid kit
- Sufficient protection from insects

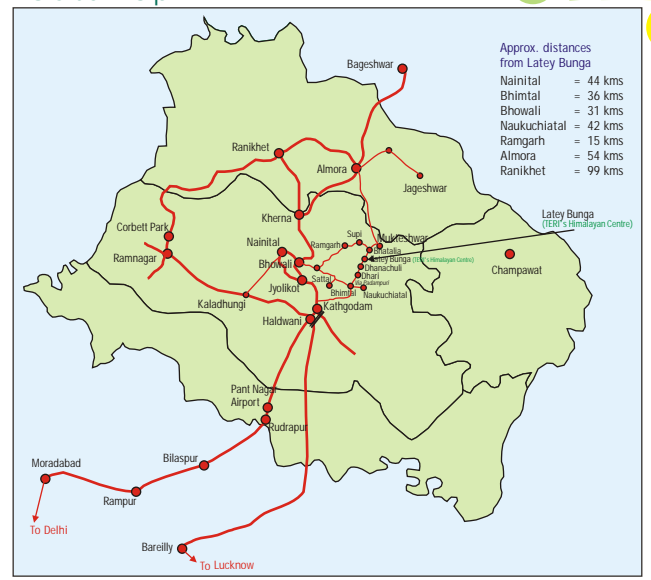

## How to Get there

DeraGreen is nestled in Mukteshwar, a secluded hill station located 395 km from Delhi and 51 km from Nainital. The nearest railway station is at Kathgodam, 72 km from Mukteshwar. Buses and taxis ply from there. Mukteshwar is situated about 2300 metres above sea level. The weather here ranges from pleasant to cold, which makes it a fantastic year-round destination.

# TERI DeraGreen

## MUKTESHWAR

FUN,  
 NATURALLY!

## Wake up on the Wild Side

It's holiday time, the perfect reason to fling aside your school bag and wake up on the wild side!

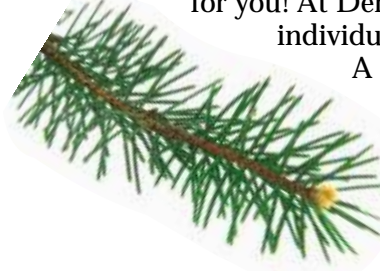

TERI DeraGreen at Mukteshwar offers you an adventure-filled holiday in the luxurious lap of nature. Watch butterflies and kingfishers flit by, trace the path the intrepid Jim Corbett walked on (you, too, might spot a leopard!) or challenge yourself with adventurous activities.

## Ecotourism: A Cool Way to Care for Mother Earth

If you care for Mother Earth, ecotourism is the thing for you! At DeraGreen, we encourage young individuals to connect closely to the planet.

A stay at DeraGreen is aimed at instilling a sense of preserving nature's bounties for the future. The camp promises to leave a light ecological footprint. Each one of its structures is built so as to borrow, not snatch, from nature's resources.

## The Adventure Begins

We aim to make DeraGreen an unforgettable yet learning experience! We offer a range of activities and adventures to inculcate leadership skills, personality development, and team spirit among young participants. Without using textbooks, you can learn social science, science, geography, and environmental studies, thereby linking the activities to your curriculum.

Here is a list of some of the things you could do:

- Follow exciting trekking trails
- Take an eco-walk through the cool and dewy forest paths
- Discover team spirit while rappelling and river-crossing
- Climb up to Chauthi Jali, the 'sunset point' of Mukteshwar; the unique rock formations and steep cliffs make it an ideal spot for rock climbing
- Splash away at the Lama Langa waterfalls, and visit the near by lakes of Sat Tal and Naukuchiyatal
- Get close to nature's marvelous creatures; go bird watching and see magpies, eagles, minivets, verditer flycatchers, and woodpeckers fly and swoop in the sky
- Visit nearby hamlets and interact with local villagers and forest officers to learn more about the flora and fauna of the region
- Visit TERI's bio-farm, where you can see and learn about a variety of plants and herbs
- Gain hands-on knowledge about renewable energy technologies, such as water harvesting and solar lighting
- Participate in some action packed contests such as quizzes, painting, and kitchen experiments
- Have fun at the camp bonfire at night; share your stories, sing, dance, and play

All activities will be carried out under adult supervision to ensure that your fun trip is safe too. Apart from hands-on learning, participants shall be handed out specially created lesson plans about renewable energy technologies.
