

The Energy and Resources Institute Exhibition Stall

Hangar 2, Stall no. 2, Vigyan Bhawan, New Delhi

1st June to 4th June 2018

Over the decades, TERI has developed a rich portfolio of Intellectual Property related to renewable energy technologies and biotechnology solutions with immense potential to provide ecological and economic gain to industry and society. It has also developed a bouquet of products, services and solutions that are environment friendly.

The TERI stall at the World Environment Day 2018 Exhibition will showcase its novel in-house technologies, products and services and highlight the technical capabilities of the various Research Divisions in TERI. This will include technologies such as:

- Biomass Gasifiers – for thermal and power generation applications,
- Mycorrhiza biofertilizer – for sustainable agriculture,
- Oilzapper bioremediation – for cleanup of oil contaminated soil,
- TEAM Process – a ‘waste to energy solution’.

TERI will also display its range of organic products that have been developed as a part of its TRISHA (TERI’s research initiative at Supi for Himalayan Advancement) Initiative in Supi village, near Mukteshwar in the Nainital district of Uttarakhand.

TERI Press is the publication arm of TERI, and it has put together an impressive range of publications related to energy, environment and sustainability for all age groups. These titles will be on display at the TERI stall.
