1300-1400	**LUNCH**
1400 -1600	**Panel Discussions: Digital Library policy and strategic planning** Many concerns related to digital library and its allied fields are deeply rooted in the developing countries. This is due to lack of awareness, non availability of standard digitization manual for regional (localised) requirements and insufficient knowledge of policy related issues. The Governments, Academic institutions and non -governmental organizations, media as well as other information stake holders have an enormous responsibility towards sensitising the society and finally leading to a knowledge society by using digital technology. The challenge ahead is to develop a ***roadmap for digitization of archives, manuscripts and libraries*** for developing countries. Another challenge is developing guidelines or ***direction***
