

**Prof Atsuyuki Morishima**  
**Faculty of Library, Information and Media Science,**  
**Centre for Artificial Intelligence Research,**  
**University of Tsukuba**  
**Japan**

Prof Atsuyuki Morishima is a professor of University of Tsukuba, Japan. His research interests include data-centric human-machine computations, data integration and digital libraries. Currently, he is an editor-in-chief of IPSJ transactions on Database Systems, an associate editor of the VLDB Journal, and an executive committee member of ICADL. He is the leader of JST CREST CyborgCrowd Project and the representative of the Crowd4U initiative.

He has been involved in many real-world crowdsourcing projects on digital libraries, digital archives, natural disaster responses and smart cities. He received international and domestic awards including the second-runner-up for the ACM SIGMOD 2001 best paper award, the 2004 IPSJ best paper award, the CAiSE 2015 best paper award and the 2018 Emerald Literati Award.

In the past, he served as the chair of SIG-DBS of the Information Processing Society of Japan, and a steering committee member of ACM SIGMOD Japan Chapter. He served as program or organizing committee members of major conferences including VLDB, SIGMOD, ICDE, EDBT, JCDL, ICADL, iConference, ECDL, HCOMP, CIKM and DASFAA. He served as program co-chairs in ICADL 2016 and JCDL 2019.
