Prof. Michael Seadle
Professor,
Humboldt University of Berlin,
Germany

Prof Dr Michael Seadle has written on a wide range of subjects including research integrity, research methodology, digital archiving, copyright, digitization, computing management, and German history. He has been principal investigator on grants from the German Research Foundation (DFG), the National Science Foundation (NSF), and the Institute for Museum and Library Services (IMLS). His current research areas are research integrity and long term digital archiving.

For almost twelve years he was Director of the Berlin School for Library and Information Science at Humboldt-Universität zu Berlin. For six years he was Dean of the Humanities Faculty, and Deputy Dean for two years. He was editor of Library Hi Tech for 20 years and is still editor-in-chief of World Digital Libraries. He still chairs the University's Commission on Research Malpractice. Internationally he is past chair of the iSchools, which currently has 100 member schools, and he now serves as its executive director. He is director of the HEADT Centre (Humboldt Elsevier Advanced Data and Text Centre) and leads its research integrity unit.

He worked previously at the University of Chicago, Cornell University, and Michigan State University. For some decades he did operating system and assembly language programming in industry and non-profit institutions.
