

Gagandeep K. Bhullar
Founder & CEO
SuperHumanRace

Indian technologist and entrepreneur. She founded the Super Human Race in 2016 with the vision to employ technology for creating a 'good' economy. The Super Human Race automates social purpose for companies in India & North America through the use of data analytics, gaming & behavioural dynamics. In her current role, Gagan splits her time between the SuperHuman Race's offices & customers in India and N. America to provide a unified vision for product design, translating social & environmental impact into numbers through the use of a revolutionary modular design framework along with intensive data modeling.

Previously, Gagan held various leadership positions with The Boeing Company in India and N. America. In 2014, she became the first locally hired employee from Asia to be selected into the company's flagship leadership programme, where only one leader from across Boeing's offices worldwide is invited to participate in each year.

Gagan started her career with a defense & aerospace startup where she worked extensively with partners and collaborators in Europe & Asia as well as the Government of India, including former President APJ Abdul Kalam's scientific advisory team. Gagan is passionate about making the world a better place, through the use of data and the power of human kindness.
