

**Mr G.S Saxena**  
**Vice- President,**  
**Engineering,**  
**VA Tech WABAG Limited**

Mr. G. S. Saxena heads the Engineering Division of VA Tech WABAG Limited, based at headquarters in Chennai. WABAG is a pure play water technology company with over 9 decades of experience in water treatment including design, engineering, operations and maintenance of treatment projects for both the municipal and industrial sectors. A multi-national, with a strong presence in over 20 countries and over 100 patents to its credit, WABAG is today recognized as the market leader in water and wastewater treatment in India.

As Head of Engineering, he is responsible for implementation of advance technologies, continuous improvement in engineering methodology of all the projects, plants' commissioning and technical support for plants under operation of WABAG. Some of advance technology projects like PTA Wastewater treatment plant of Reliance and Wastewater treatment plant at Bahrain have been commended by Global Water Intelligence at its Global Water Summit in 2016.

Mr Saxena is an active member of the International Water Association (IWA). He is also one of the key members of Global Technology Taskforce Committee formed by WABAG to leverage latest state-of-the-art technologies available in the water sector. He is a key member of WABAG Knowledge Management System, ensuring implementation of latest technology, continuous improvement in WABAG projects. He also represented WABAG at the various international fora.

Mr Saxena is a Graduate in Chemical Technology and possesses more than three decades of experience. Prior to WABAG, Mr. Saxena worked in heavy chemical industry producing chloro-alkali and fertilizer in Operations & Technical Services.
