Mr Sandeep Mahajan
Remote Sensing, GIS & IoT Professional
(Specialization in Water resources management)
SUEZ India

Mr Sandeep Mahajan has professional experience of over 18.9 years. He has been working as a Head of the department for GIS and IoT since 2013 in World's leading Water Distribution and Waste Water Management organization SUEZ, which is a France based multinational organization. His main responsibilities in SUEZ are providing scientific and operational solutions through Geospatial technologies and IoT's for Water distribution network systems and Water / Waste Water treatment plants management. Currently he is the leading member for Geospatial and IoT solutions in prestigious wastewater management projects (below mentioned) in Lucknow, India, which was awarded to SUEZ. Project Name: Operation Maintenance and Management of the Sewerage Treatment System and Sewerage Network for Lucknow city in the state of Uttar Pradesh (Under State Ganga River Conservation Agency)**.** In the past, he has been Program Coordinator at Columbia Water Center (Columbia University New York, USA) from 2010 to 2013 where he worked mainly on water and energy conservation directly with farmers for various interventions to conserve the irrigation and increase the farmers income. Various government and non-governmental organizations were also stakeholders in this project from Gujarat, Punjab and Jharkhand states of India.
