

Mr Somnath Banerjee
Country Manager, Technology Enablement, South Asia,
McAfee Professional Services

Somnath has over 22 years of experience in the field of Information Technology with specialization in both systems and networks assisting customers in their infrastructure optimization by providing technical guidance and identifying gaps in their infrastructure and filling them up with the required technology building block.

Within McAfee, Somnath provides, technology enablement, security consulting involving architectural review, security audits and solution design for different verticals of McAfee technologies such as Network & Endpoint Security, Data Protection, Security Risk Management & Compliance etc.

Somnath has successfully designed, implemented & integrated system security solutions for many global customers across Asia Pacific for various industry verticals like BFSI, Federal, Telecom, IT & ITES etc. in the capacity of a Lead Consultant.

Prior to McAfee, Somnath was a Technology Specialist with Microsoft Corporation, where he acquired substantial experience in developing a healthy IT Infrastructure and thereby adding value to customers, resulting in expanded deployments of various Microsoft's technologies and doubling up as their trusted technical advisor and leading them to a People Ready Business paradigm providing a holistic view on the security posture for the customer and give recommendations accordingly.

On the personal front Somnath has a passion for wildlife & nature photography and is an avid aviation enthusiast.
