

WHAT'S IN STORE FOR YOU?

GREEN Olympiad, is TERI's flagship initiative for schools. The programme incorporates diverse elements of environmental education, with the aim to enrich students' understanding of environmental issues and empower them to act as agents of change for the planet. At TERI these efforts are aligned with the educational aspirations of schools, thereby nurturing students' capacity to drive meaningful environmental transformation.

WHY SHOULD YOU PARTICIPATE ?

Participating in the GREEN Olympiad offers students a unique opportunity to deepen their understanding of environmental and sustainable development issues. It creates an educational environment within schools where students can learn about green skills. Additionally, there are opportunities to engage in other environmental education initiatives by TERI.

LIST OF EXISTING PROJECTS

Programme LEAD (Leadership for Environment, Awareness and Development) 2024

TERI's Education for Youth Empowerment (EYE) area implements a programme LEAD, which features as a summer initiative tailored for school students. Its objective is to deepen their understanding and capabilities regarding environmental and sustainable development matters, offering tools and networks to bolster their skills. The programme incorporates expert-led technical sessions, practical training, internship prospects, and guidance on sustainability issues. It spans research, science, technology, community involvement, and outreach, aiming to cultivate environmentally aware students capable of effecting change within their circles and communities.

Ocean Matters : Safeguarding our Oceans

The U.S. Consulate General Chennai, in collaboration with The Energy and Resources Institute (TERI), launched a programme focused on evidence-based awareness and education. This initiative trains and mentors schools to gather, document, and analyze environmental data concerning climate change and marine pollution. It aims to build capacity and enhance skills among students, educators, and the community to promote awareness and actively protect ocean health. Phase I trained 100 schools in coastal cities like Mumbai, Mormugao, and Mangalore, and Phase II aims to extend to an additional 100 schools in Chennai, Kochi, and Puducherry.

OTBL Campus Impact Challenge : A Youth Initiative for Creating Positive Spaces

TERI, in partnership with ONGC TERI Biotech Limited (OTBL), presents the 'OTBL Campus Impact Challenge', designed by and for youth to foster positive environments. This programme focuses on educating participants about Sustainable Development Goals (SDGs), exploring their connections with various scientific and non-scientific initiatives. It involves identifying campus challenges, ideating solutions to transform spaces into eco-friendly environments, and emphasizes global initiatives through practical action. The centerpiece of OTBL Campus Impact Challenge (OTBL CIC) is a competition open to colleges and higher education institutions in Gujarat and Assam, encouraging them to tackle sustainability issues collectively with innovative social and environmental solutions.

Youth Climate Conclave

The Youth Climate Conclave (YCC) aims to actively involve young people in science-based discussions about pertinent climate change issues. Since its inception in 2019, four editions have been successfully organized, with future phases aiming to expand outreach to young stakeholders. The goal is to enhance critical thinking, creativity, scientific comprehension, communication skills, multilingualism, and digital literacy among participants. Key components include action-oriented youth engagement through competitions like photography, blogging, and short videos. Participants also undergo capacity-building exercises focused on climate-related topics, culminating in the creation of a Youth Declaration on Climate Action and a Youth Pledge.

Planet Calling

To address ecosystem degradation in India effectively, it is crucial to engage and educate the youth about the significance of ecosystems, their operations, and methods for conservation. TERI takes a proactive approach by organizing a unique outdoor learning programme specifically designed for youth aged 16 to 25 years. These camps are held at TERIgram in Gwalpahari, Haryana, and TERI-RETREAT in Mukteshwar, Uttarakhand, aiming to empower young people and instill a deeper understanding of environmental stewardship.
